BrainOS In A Nutshell

Oh yea! Now we’re getting somewhere :_)

Text-based version:

> Create a Site for a reusable BrainOS exploration workspace that lets me enter a command, thought, or number and then get structured results back. Include an Introduction, a Command Reference, and Experiments. Support guided exploration of powers-of-two and powers-of-three patterns with verified calculations, relationship analysis, and separate modes for mathematical analysis versus personal symbolism. Let me save, revisit, compare, and refine experiments over time. Keep the BrainOS framing clearly conceptual and preserve room for humor and creative tangents while making the outputs easy to review before I reuse them in private or public BookStack pages.
